

文档

1. vite文档: <https://cn.vitejs.dev/guide/>
2. vue文档: <https://cn.vuejs.org/>
3. element plus: <https://element-plus.org/zh-CN/>
4. axios: <https://www.axios-http.cn/>
5. typescript: <https://www.runoob.com/manual/gitbook/TypeScript/book/>

创建项目

1. 创建项目

```
npm create vite@latest
```

```
PS E:\Work\Code\go\5.0\project-practice\tuchuang-web> npm create vite@latest
Need to install the following packages:
  create-vite@4.4.1
Ok to proceed? (y) y
✓ Project name: ... tuchuang-web
✓ Select a framework: » Vue
✓ Select a variant: » TypeScript

Scaffolding project in E:\Work\Code\go\5.0\project-practice\tuchuang-web\tuchuang-web...

Done. Now run:

  cd tuchuang-web
  npm install
  npm run dev
```

组件或依赖添加

1. 添加element plus

```
npm install element-plus --save
```

完整引入

如果你对打包后的文件大小不是很在乎，那么使用完整导入会更方便。

```
// main.ts
import { createApp } from 'vue'
import ElementPlus from 'element-plus'
import 'element-plus/dist/index.css'
import App from './App.vue'

const app = createApp(App)
app.use(ElementPlus)
app.mount('#app')
```

2. 添加 axios

```
npm install axios
```
